

WE'RE HIRING SENIOR ACCOUNTANT & FINANCE OPERATIONS

LOCATION: Bangalore, Karnataka (On-site, 6 days a week)

DEPARTMENT: Finance & Accounts

REPORTING TO: Finance & Growth Lead

ABOUT NAXATRA LABS

Naxatra Labs is a deep-tech manufacturing startup building high-efficiency electric motors for EVs, agriculture, drones, and industrial applications. As we scale, we are building robust, well-documented finance and compliance systems and we need a strong operator to own and run them day to day.

ROLE SUMMARY

This is a middle-management role that sits between the Finance & Growth Lead (CFO) and the team. You will be the owner of finance operations — responsible for ensuring that all accounting, compliance, and finance processes run accurately and on time, are continuously improved, and serve as the single point of contact for finance across the business. You won't be doing all the data entry yourself; instead you will review, oversee, and own the output of the team, while driving process discipline, reporting quality, and crossfunctional coordination.

KEY RESPONSIBILITIES

FINANCE OPERATIONS OWNERSHIP

- Own end-to-end finance operations: accounting, AP/AR, payroll, banking/treasury operations, and vendor management
- Ensure all finance processes are documented, followed, and improved as the company scales
- Act as the operational backbone of the finance function, with extended scope for strategy, fundraising, and investor matters

ACCOUNTING & COMPLIANCE OVERSIGHT

- Review and oversee day-to-day accounting handled by the junior accountant and outsourced team (sales, purchase, expense, and bank entries, BRS, ledger reconciliations, fixed asset register)
- Own accuracy and timeliness of statutory compliance — GST (GSTR-1, GSTR-3B, reconciliation, notices), TDS (26Q/24Q), PF & ESI — executed by the team and reviewed by you
- Coordinate statutory audits and serve as the primary liaison with the CA / auditors

MIS & REPORTING

- Own monthly MIS: P&L, expense analysis, cash flow, and ageing (receivables/ payables)
- Track working capital and surface insights, dashboards, and variances to management
- Ensure reporting is delivered accurately and on a predictable monthly calendar

BUDGETING & FP&A SUPPORT

- Support budget tracking, variance analysis, and department/project cost tracking
- Assist the team with forecasting and cash-flow planning

PROCESS IMPROVEMENT & CONTROLS

- Identify gaps in current processes and implement improvements, automation, and stronger internal controls
- Maintain audit-ready documentation and enforce company accounting policies

CROSS-FUNCTIONAL COORDINATION (FINANCE POC)

- Serve as the single point of contact for finance across Accounts, Supply Chain, R&D, Production, and Sales
- Coordinate on vendor onboarding, PO/payment approvals, reimbursements, and budget queries across departments
- Communicate clearly with stakeholders across locations and functions

SUCCESS METRICS (KPIs)

- Timely monthly book close and MIS delivered by an agreed working day each month
- Zero late filings or avoidable penalties across GST, TDS, PF, and ESI
- Clean, audit-ready books and smooth statutory audits
- Accurate reconciliations (bank, vendor, customer) with minimal exceptions
- Measurable process improvements / automation implemented over time

QUALIFICATIONS & EXPERIENCE

- **Bachelor's degree in Commerce / Accounting / Finance**
- **4+ years** of relevant accounting and finance-operations experience (manufacturing / startup preferred)
- CA / CMA (qualified or Inter) is a plus, but not mandatory. We prioritise the right skill set and ownership over certificates

SKILLS & TOOLS

- Hands-on with the Zoho suite (Zoho Books and broader Zoho applications)
- Experience with payroll software and payroll processing
- Strong working knowledge of GST, TDS, PF, and ESI
- Strong Excel skills (XLOOKUP/VLOOKUP, pivot tables, formulas)
- Comfort using AI tools to speed up finance and accounting work is a strong plus
- Solid grasp of MIS and budgeting concepts
- Excellent communication skills to work with stakeholders across functions and locations
- High attention to detail, ownership mindset, and a compliance-first approach

WHAT WE'RE LOOKING FOR

- A hands-on, reliable, process-driven operator who takes ownership
- Someone comfortable in a fast-moving startup + manufacturing environment
- A person who wants to build and grow the finance function as the company scales

WHY JOIN NAXATRA LABS

- Work at the cutting edge of India's electric-motor technology, alongside leading researchers, operators, and investors, an exceptional learning opportunity with regular exposure to the people building the future of EV and industrial motors.
- Own and shape the finance operations of a fast-growing deep-tech manufacturing startup
- End-to-end exposure across accounting, compliance, MIS, and FP&A
- Clear path to grow into senior finance leadership as the team scales
- Compensation based on skills and experience

Join us in electrifying the future of transportation and energy!

HOW TO APPLY

Send your CV and cover letter to careers@naxatralabs.com.

We look forward to hearing from you!
